

Projectors

P7 Series

The professional Acer P7 Series employs advanced technologies and convenient setup utilities to deliver clear, persuasive presentations in large business venues. Enterprising innovators like you will appreciate the high resolution, brightness and contrast ratio to drive your ventures toward greater success. [Acer Projection Calculator](#)

Remarkable visuals

This professional projector is the perfect workhorse for big meetings, presenting fantastically clear and vibrant images even in amply lit venues. Acer's advanced color technologies ensure color brilliance, and guarantee consistent image quality despite prolonged use.

Wireless convenience¹

Experience true presentation freedom -- project from any PC in the room over an 802.11b/g/n network, or use the MobiShow application to present from a Windows® Mobile smartphone. You can also use the Remote Desktop feature to access content from any PC that's connected to the projector via LAN or Wi-Fi® and has launched the Acer eProjection utility. What's more, the P7 Series complies with the Crestron® Network System so you can control the projector over LAN or Wi-Fi®.

Installation flexibility

The Acer Side-Loading Lamp design makes lamp replacement trouble-free, even while the projector remains ceiling-mounted. The keystone correction feature eliminates distortions resulting from elevated or side projection. Furthermore, with the Display over USB1 feature, images from your PC can be displayed as soon as a USB cable connects the PC and projector.

Empowering usability

The Empowering Key provides easy access to the useful suite of Acer Empowering Technology tools. Acer SmartFormat technology offers instant projection of wide-format content, without complicated resolution settings. With Acer Instant Pack technology, you can safely unplug the power cord right after the projector is turned off -- you don't have to wait till it cools down, so you can pack up and go immediately.

P7290

Display Panel 0.7" DarkChip™ 3 DMD - contrast Ratio '3000:1 - Brightness 5,000 ANSI Lumens (Standard) - 4,000 ANSI Lumens (ECO) - Projection Screen Size 31" (79cm) ~ 300" (762cm) - Lamp life 2,000 Hours (Standard) - 3,000 Hours (ECO) - Projection Mode Front - Rear - Front-Ceiling - Rear-Ceiling - Weight 12 lbs (5.4Kg)

S5 Series

The Acer S5 Series projects big and clear images even if the projector is positioned very close to the screen. DLP® 3D Ready and packed with the latest technologies, the S5 Series makes meetings more productive and classes more exciting. What's more, networked management tools offer remote monitoring, control and reporting systems. Acer Projection Calculator

Dynamic 3D visuals

View visuals with unprecedented clarity and brilliance thanks to native XGA resolution plus high brightness contrast ratio. Put on the DLP® Link 3D glasses and be completely engrossed by stunning 3D movies, games or videos from a qualified PC or 3D player. Acer's advanced color technologies guarantee consistent image quality despite prolonged use.

Interactive versatility

Use the Acer SmartPen1 to draw or write on the projected image from anywhere in the room, for more interactive meetings and enhanced learning. The S5 Series complies with the Crestron® Network System so you can control the projector over LAN or Wi-Fi®. In addition, you can connect to HD digital sources using the HDMI® port.

Empowering usability

Press the Empowering Key for easy access to the useful suite of Acer Empowering Technology tools. Acer SmartFormat technology offers instant projection of wide-format content. With Acer Instant Pack technology, you can safely unplug the power cord right after the S5 Series is turned off, so you can pack up and go immediately.

Earth-caring functionality

Acer EcoProjection technology cuts standby power consumption to a single watt for environment-friendly energy management. The long lamp life cuts lamp replacement costs and ensures long-term, dependable projector use. With the Auto ECO feature, the projector automatically enters ECO mode if there is no signal input for 5 minutes, resulting in an up to 20% further reduction of power consumption.

P5 Series

This series of professional projectors delivers advanced visuals, complete control, and brilliant color all with earth-caring functionality. With DLP® 3D-ready functionality, you can deliver impressive high-definition 3D presentations. Powerful color technology preserves and enhances visuals' true color. Special software enables seamless control via a LAN or Wi-Fi®1 connection. Finally, energy-efficient functions help cut costs and save the environment. Acer Projection Calculator

Advanced 3D visuals

These projectors are DLP® 3D-ready, so you can enhance presentations or lessons with engaging 3D content. The high-resolution display presents smooth, clear image details and excellent text readability. And, exceptional brightness and contrast ratio means the onscreen darks and whites are vivid even in venues with a lot of light.

Complete control

Crestron® network control lets you conveniently set up and connect your projector from any PC over LAN or Wi-Fi®1. Capabilities include scheduled remote power on/off, remote projection control with source selection, an email alert system, multiple-projector control, and online dialog with the administrator.

Brilliant color

Acer ColorBoost II+ technology delivers vivid and natural colors, while Acer ColorSafe II technology1 prevents color decay to preserve the integrity of images even after prolonged use of the projector.

Earth-caring functionality

Acer EcoProjection technology cuts power in standby mode from 5 W to 1 W to conserve energy. Other eco-conscious technologies include long lamp life, a power-saving mode, and automatic shutdown after a pre-set period without signal input.

H5 Series

The compact, chic-white Acer H5 Series projector transforms your living room into a home theater via native 16:9 HD-ready projection, HDMI® connectivity, brilliant color reproduction -- and immersive stereoscopic 3D entertainment! Acer Projection Calculator

Perfect movie projection

Native 720p (HD-ready) resolution sharpens movie details; true 24p frame rate preserves real film quality; and high brightness and contrast ratio project crystal-clear images. Wall-color compensation lets you project accurate images even on colored walls, and HDMI® connectivity portrays brilliant games and entertainment in the comfort of your living room.

Immersive 3D visuals

Stereoscopic visuals add depth and feeling to games, movies and photographs. The H5 Series projector is certified for leading 3D solutions. NVIDIA® 3D Vision kits transform hundreds of PC games to full stereoscopic 3D, and DLP 3D Ready kits with high refresh rates render a flicker-free 3D experience.

Easy-to-use design

The Acer Empowering Technology suite of tools helps you conveniently customize your power, viewing and timer settings via the Empowering Key on the remote control. Instant Resume allows you to instantly turn the projector back on without waiting for it to cool to room temperature. Acer EcoProjection technology cuts standby power consumption from 5 W to 1 W.

H5360

H7 Series

This chic white series of projectors gives you Full HD 1080p widescreen cinematic enjoyment with images in living color! Enhanced color technologies, ultra-high dynamic contrast ratio and HDMI® connectivity effortlessly deliver brilliant games and entertainment right in the comfort of your living room. [Acer Projection Calculator](#)

Enhanced color technologies

Acer ColorBoost II+ and Acer ColorSafe technology¹ work together to present richer details, smoother gradation, and brighter natural colors, while preserving the color integrity of your images. Wall-color compensation lets you project accurate images on colored walls, so you're not limited to a white background.

Keeping images alive

The ultra-high dynamic contrast ratio means superior black levels while maintaining the original luminance of bright scenes for optimized imagery. What's more, images are portrayed vividly even in brightly lit living rooms thanks to a high-intensity lamp.

Complete digital connectivity

HDMI® connectivity offers quick, high-definition fun from game consoles, media players, or computers. HDMI® delivers exceptional high-definition viewing and provides the highest-quality video and audio currently available via a single cable connection.

Smart signal detection¹

Acer Smart Detection automatically detects which source input is plugged in; no need to cycle through a long list of input sources. In the event of multiple sources, Acer Smart Detection remembers what input source is frequently used and automatically switches to that source.

H7530D

Display Panel 0.65" DarkChip™ 2 DMD - contrast Ratio '40,000:1 - Brightness 2,000 ANSI Lumens (Standard) - 1,600 ANSI Lumens (ECO) - Projection Screen Size 27" (67cm) ~ 300" (762cm) - Lamp life 2,500 Hours (Standard) - 4,000 Hours (ECO) - Projection Mode Front - Rear - Front-Ceiling - Rear-Ceiling - Weight 6.9 lbs (3.2Kg)

C Series

The ultra-lightweight Acer C Series LED pico projector fits easily in your pocket. Carry it along with an external device¹ and you can present anywhere, even without a PC. Sufficient battery life beams your videos, photos and on-the-spot business presentations in various formats. What's more, a 15" portable screen (optional) that's foldable and easy to carry allows flexible mobile projection with quality imagery. Acer Projection Calculator

Lively display

The incredibly light C Series projector boasts exceptional resolution and stunning brightness along with very high contrast ratio to deliver crystal-clear visuals. And, with Acer ColorSafe technology, the color integrity of your images is preserved even after prolonged use of the projector.

Convenient and flexible on the go

This compact and light palm-sized projector is very easy to set up. Enjoy direct access of files stored in your external device¹ -- no need for a PC or video player! You can also connect to high-definition sources using the mini HDMI® port.

Dynamic usability

Your presentation will be smart and simple via this projector's immediate detection of input signals and complete multi-format support, which includes leading presentation software. In addition, a built-in speaker provides quality audio for enhanced presentations and entertainment.

Eco-friendly functionality

The Acer C Series features eco-conscious technologies: long LED lamp life saves lamp replacement costs and ensures long-lasting projector use; a power-saving mode extends the lifespan of the LED lamp and reduces power consumption; and this projector's fan-less² design saves cost while delivering quiet enjoyment.

K Series

The pocket-size Acer K Series is so small that you can project vibrant visuals from one hand. Despite its small size, this mini projector features high brightness, an intuitive UI, rich media functionality, and easy setup in various environments. Additionally, the Acer K Series uses a mercury-free LED light source to ensure longer lamp life while protecting the environment. [Acer Projection Calculator](#)

Pocket-size, radiant display

Ultra-light and portable, the K Series is convenient to bring anywhere! The projector casts high lumens brightness so you get vibrant visuals and better color saturation thanks to LED technology. The long lifespan of the LED lamp translates to big savings, while the absence of hazardous mercury or halogen gases means safer use for you and the environment.

Effective, mobile usability

The K Series may be small, but it is big in performance. The high contrast ratio enables projection of detailed text and visuals from a long distance on a large screen; Acer SmartFormat technology offers complete multi-format support for both 4:3 displays and widescreens; and with Acer Instant Pack technology, you can unplug the power cord right after the projector is turned off, and rest assured that no damage will be caused.

P3 Series

The diminutive Acer P3 Series is ultra-lightweight yet packs leading projection technologies to deliver high-impact performance wherever you go. Enjoy PC-less projection using an external storage device¹ to beam photos, videos and movies directly from this projector. What's more, power-saving technologies lower costs and conserve resources. Acer Projection Calculator

Prolific imagery for effective presentations

Advanced technologies optimize color balance and details, delivering more brilliant projection. An exceptional resolution shows sharp details even for fine print, while very high lumens brightness and contrast ratio project crystal-clear images in venues of various sizes.

Versatile installation and connectivity

The Acer P3 Series renders captivating 3D visuals via DLP® 3D Ready² technology. An HDMI® port delivers uncompressed digital signals and multi-channel audio, while other dedicated ports allow you to connect other devices. And, with a tailored installation menu, you can quickly set up your projector without waiting for signal input.

Empowering usability

The Empowering Key provides one-touch access to essential tools including a new-generation management which helps create a customized startup screen. This smart projector also offers instant projection of wide-format content without complicated resolution settings.

Eco-friendly functionality

Acer EcoProjection technology cuts standby power consumption to a single watt, for earth-friendly power management. Other eco-conscious technologies include long-lasting lamp life and automatic shutdown after a pre-set period without signal input. Topping it off, this projector allows you to safely unplug the power cord right after the projector is turned off.

P1 Series

The Acer P1 Series presents breathtaking visuals for remarkable SMB or classroom presentations. Convenient utilities enable easy setup, while advanced power-management solutions conserve energy and the Earth's resources. To top it off, the P1 Series is available for remarkably good value. Acer Projection Calculator

Prolific 3D imagery

Whether you're making business presentations or giving academic lectures, the DLP® 3D Ready P1 Series renders fascinating, multi-dimensional imagery¹. Advanced Acer color technologies enliven graphics with lifelike colors and preserves image integrity even with prolonged use. High brightness, contrast ratio and resolution depict sharp details.

Convenient installation

The keystone correction feature eliminates image distortions resulting from elevated projection. Thanks to the installation menu, signal input from a notebook is no longer required, so mounting the P1 Series on the ceiling is fast and convenient. To top it off, the Acer Top-Loading Lamp design affords easy lamp replacement even while the projector is ceiling-mounted¹.

Empowering usability

The Empowering Key offers instant access to Acer Empowering Technology tools for easy customization of power, viewing and timer settings. Acer SmartFormat technology facilitates projection of wide-format content without complicated resolution settings. Acer Instant Pack technology lets you safely unplug the power cord right after the projector is turned off, so you can pack up and go immediately.

Eco-friendly functionality

Acer EcoProjection technology cuts standby power consumption to a single watt, for environment-friendly power management. The long lamp life cuts lamp replacement costs and ensures long-term, dependable projector use; ECO mode extends lamp lifespan and reduces noise and power consumption. With the Auto ECO feature, the projector automatically enters ECO mode if there is no signal input for 5 minutes, resulting in an up to 20% further reduction of power consumption.

X1 Series

The Acer X1 Series projector boasts outstanding performance with rich colors, superb clarity, excellent 3D1 entertainment and a true 24p1 frame rate for a cinema-like experience. A long-lasting lamp life and practical lamp design keep maintenance costs low. And, Acer EcoProjection technology reduces power in standby mode from 5 W to 1 W, while Acer ColorSafe technology preserves the color integrity of your images even after prolonged use of the projector. [Acer Projection Calculator](#)

Lively display

Enjoy immersive visuals for games, movies and photographs beamed from the Acer X1 Series projector, certified for leading 3D1 solutions. Beyond that, advanced technologies depict optimal color balance and allow accurate image projection, even on colored walls. Plus, an exceptional resolution and high brightness project crystal-clear images.

Installation flexibility

This chic-looking projector is designed to simplify lamp replacement even when it's ceiling mounted. Correction technologies ensure the right orientation and present perfect view, while digital magnification project interesting details of your displayed content to your preferred spot. What's more, dedicated ports allow you to connect other devices to your projector.

Dynamic usability

The Empowering Key provides one-touch access to essential tools, including new-generation management that helps you create a customized startup screen. This smart projector also delivers instant projection of wide-format content without complicated resolution settings.

Eco-friendly functionality

Acer EcoProtection technology reduces power in standby mode from 5 W to 1 W to conserve energy. Other eco-conscious technologies include long-lasting lamp life, a power-saving mode, and automatic shutdown after a pre-set period without signal input.
